STATINTL

Dear [Redacted]

The schedule developed by your office on the referenced job order accents the criticality of time in getting job completion by the 15 August 1969 deadline established. This completion date is dictated by the delivery date of the sophisticated optical equipment for which the site is being prepared.

The work involved includes extensive work with the existing air-conditioning systems which must be kept functioning. Further, the site of the work is in a sensitive area. The nature of the equipment for which the site is being prepared is also sensitive. Any break in the phasing of the mechanical work that adversely affected the continuity of operation of the air-conditioning systems in the building or any break of security could have an adverse effect on the national security.

It is requested that the bidding for the construction contract for this project be limited to a selected list of qualified contractors so as to insure that the problems cited above will be reduced. I appreciate your efforts to insure completion by the deadline date established.

Sincerely,

STATINTL
